Backup, disaster recovery e business continuity: elementi fondamentali e modalità di implementazione

I principali adempimenti di compliance al GDPR

Le procedure di acquisto di beni e servizi pubblici con particolare riferimento all'acquisto dei beni e servizi informatici.

Il diritto d'accesso come previsto dalla l. 241/1990.

### **Investment 1.1: Digital infrastructure**

The aim of this investment is to ensure that the systems, datasets and applications of the public administration are hosted in highly reliable data centers, with high quality standards for security, performance, scalability, European interoperability and energy efficiency. For this purpose, the investment envisages the creation of a state of the art, fully-redundant, national cloud-based hybrid infrastructure (called 'Polo Strategico Nazionale', PSN), the certification of secure and scalable public cloud alternatives and the migration of the datasets and applications of the public administration to a cloud environment.

The PSN infrastructure is expected to be operated by a technological provider selected through a European tender and to be designed in adherence with the data interoperability standards defined at European level accordingly with Gaia-X initiative to allow the free exchange of non-personal data between the various Member States by interconnecting their national cloud models.

[Similar requirements are expected to be adopted in the pre-qualification of public cloud providers. The migration of the datasets and applications of the public administration towards the PSN or towards secure certified public cloud providers is expected to depend on the requirements for performance, scalability and sensitivity of data defined by the different administrations, each of which is expected to retain its independence in the development of applications and the management of data.]

### **Investment 1.3 – Data and interoperability**

The objective of this investment is to ensure the full interoperability of key datasets and services across central and local public administrations as well as the harmonization with other EU countries of the service procedures prioritized by the “Single Digital Gateway” directive.

The measure envisages the development of a National Digital Data Platform (“Piattaforma Digitale Nazionale Dati”) that shall guarantee the interoperability of datasets through a catalog of Application Programming Interfaces (APIs) shared across central and local administrations (Investment 1.3.1). When built, this platform shall guarantee the interoperability of datasets through a catalog of Application Programming Interfaces (APIs) shared across central and local administrations. The Platform shall be fully compliant with EU law.

[In addition, the measure envisages the development of a “Single Digital Gateway” in compliance with EU Regulation 2018/1724), that shall be run to help central and public administrations restructure prioritized procedures/processes and enable the fulfilment of the “once-only” principle (Investment 1.3.2).]
